

## What's the idea?

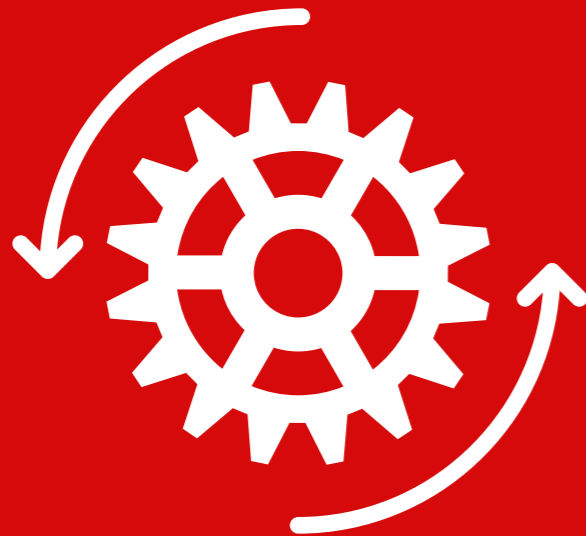

66% of students format their bibliographies manually (according to a survey done in 2014 with 700 respondents). We have asked them why:

« The softwares like EndNote and Mendeley are too complex. Zotero is simpler but you must be disciplined enough to add references as you read them. It's not my case! »

**Thomas B., 24 years old.**

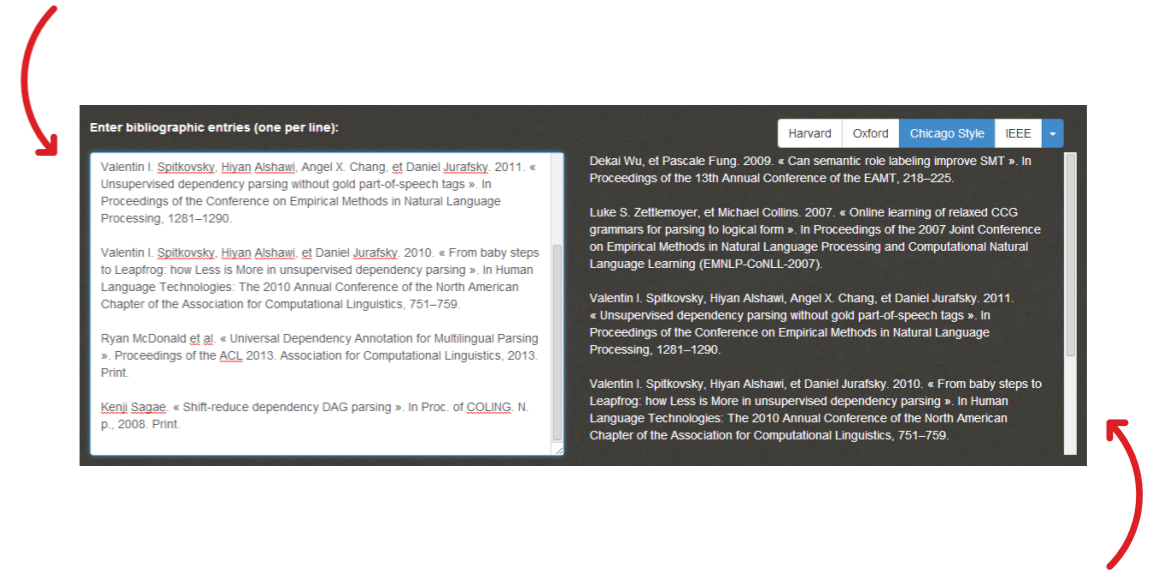

We have decided to change that!

# How does it work?

You copy-paste bibliographical references written in various styles.

And you instantly get a uniform bibliography in the style you want.

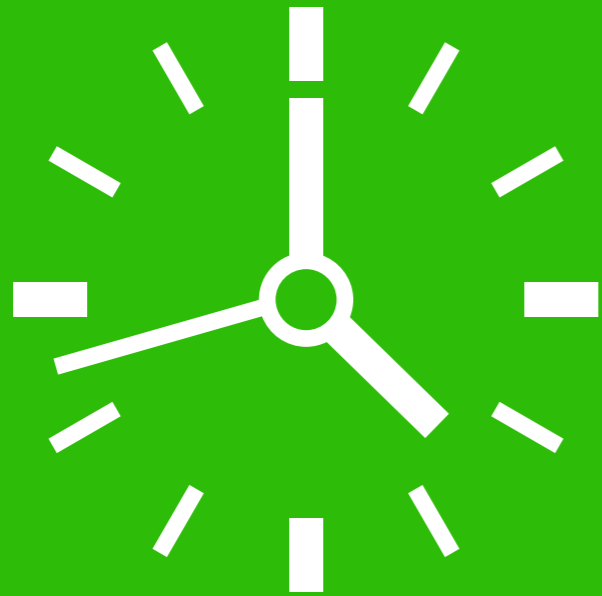

## Is it reliable?

Bibleak recognizes **95%** of the bibliographical references. If a reference can not be processed, Bibleak warns you.

Furthermore, Bibleak is able to do reference completion when some elements are missing! (Yes, you read well.)

Bibleak works with references written in English, French, Spanish, German and Portuguese.

## What's in it for me?

Time saved.

Formatting and completing a 2-page bibliography takes **3 hours** in average if you do it manually.

With Bibleak, it takes just **a few seconds**.

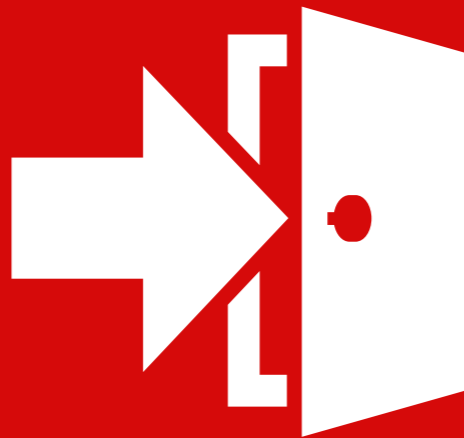

## What else?

Quality.

Bibleak ensures you produce bibliographies conform to the highest academic standards in the world.

For your own reputation and the one of your organization, properly crediting your sources is **essential**.

## How do I access it?

If your organization has a Bibleak licence, you can access the service by logging to your **organization portal**. Bibleak can be easily integrated with authentication systems such as CAS, OpenID and OAUTH 2.

If your organization has not a Bibleak licence, you can create a **personal account** for 4.99€ only.
